## Summary

Junior Software Developer with experience in Flutter and ReactJS, as well as knowledge in .NET and SQL Server. I have worked on mobile and web application development, implementing new features, fixing bugs, and automating tests. I quickly learn new technologies and collaborate well in agile teams, always applying best practices for clean code, performance optimization, and efficient development.

## Technologies

Flutter | ReactJS | NextJS | Tailwind CSS | React Native | .NET Core | SQL Server | Postman | Git | SCRUM | LaunchDarkly | Azure DevOps | Jira

## Experience

### 1- Blip - Junior Systems Analyst (Dec/2023 – Feb/2025)

Worked in both a Mobile Squad and a Web Squad, where:

- Developed new features for the Mobile app (Flutter), following the MVC architecture to ensure readable and well-structured code.
- Fixed bugs reported by users, minimizing recurring issues and improving user experience.
- Implemented unit tests, increasing test coverage and reducing potential production errors.
- On the Web project, used ReactJS and .NET Core 8 to integrate new functionalities and optimize internal processes.
- Worked with LaunchDarkly for feature flag implementation.
- **Impact:** Enhanced product performance by reducing failures and improving user experience.

## **2- TerraLab - React Native Trainee (Oct/2022 – May/2023)**

- Developed new features and fixed bugs in the TerraMapper app, a geolocation system built with React Native.
- Used Jira Software and SCRUM for task planning and execution, aligning the team with key priorities.
- Led weekly meetings with the responsible professor, defining strategic improvements and helping to guide app development.
- Improved communication and emotional intelligence skills, essential for teamwork.
